

Item # 3 Stage under the sink (Point of Use) Water Purification Micro filtration System

This system is great for municipality, well, or lake water supply, it's perfect for high sediment, water born parasites, fluoride, chlorine, chloramines and many more.

Stage 1: By the red tubing GAC item #1012 granulated activated carbon, for sediment, particles, trihalomethanes, chlorine, bad taste and odors. To be replaced every 4-6 months, or it could be substituted with #1014 Activated Alumina filter to remove Fluoride, or item #1112, #256 filter to remove Chloramine or many other filters. Most of our systems are custom made to meet your specific needs.

Stage 2: Middle filter Item #251 KDF & GAC for heavy metals, bacteria, chlorine, bad taste and odors. To be replaced every 9-12 months.

Stage 3: Third filter item #301 a 0.5 micron carbon block. Removes, Giardia, Cryptosporidium, lead, bad taste and odors. To be replaced every 4-6 months, or when the water flow is reduced.

Some of these combinations can be used:

1. 1st. stage item #1012, 2nd. stage item #251, 3rd. stage item #301.
2. 1st. stage item #251, 2nd. stage item #1014 for fluoride, 3rd. stage item #301.
3. 1st. stage item #1112 for chloramines, heavy metals, 2nd. stage item #1017 for alkaline, to bring the Ph level higher, and item #301 for the last stage. They are so many more variation, we will build your system, based on your needs, and water quality.

Features:

Point of use, water supply on demand, for all drinking and cooking water.
