

## #600-10" Whole House Water Filter

## #600-20" Whole House Water Filter

### Point of Entry

The Whole House System is a large capacity housing for higher flow rates. We recommend installing two housings in series, or more, if needed. The first housing performs best with 5, item #603 or 20-micron item #605 sediment filter(White) (block up-flow 10" cartridge) to capture any large particles or sediment. The second housing could hold a Granulated Activated Carbon (GAC) item # 604 cartridge to eliminate the chlorine, #606 KDF85/GAC for chloramines, chlorine, iron, heavy metals, hydrogen sulphide, to control scale, algae, bacteria or item#608 KDF55 & GAC for removal of chlorine, heavy metals, bad taste and odors, or item #601, a 5 micron carbon block. This is based on your water quality, and the contaminants in the water. The Whole House System has a pressure release button to facilitate filter replacement. The 20" are made for more capacity, great for Iron removal, item #607, especially if you are utilizing well water. The #623 is to remove chloramines and hydrogen sulphide. Item #630 to remove Fluoride.

**Please note:** Usage and the quality of water in your incoming line determines when your cartridge should be changed. The smaller the micron size, the finer the filtration. For sediment, sand, silt, rust, chlorine, bad taste and odours. If you need to install the UV system for the whole house, you can, after the two pre-filters. Please call us for more information.

### POINT OF ENTRY

**Whole House System offers the following benefits:**

**For bathing, laundry, house-hold plants, brushing your teeth, washing your face, spot-less dishes, washing vegetables and preparing food, pets.**

**Please remember that your skin is the largest organ you have, and it absorbs all toxins from the water supply. Chlorine is a Carcinogen. Pure Water is life, please make it yours.**

### Model# Description

600	10"	The whole House System (Housing only) We suggest two, installed inline.
600	20"	The whole House System (Housing only) We suggest two, installed inline.
601	10"	The whole House 5 micron carbon block
603	10"	The whole house 5-micron sediment filter
605	10"	The whole house 20 micron sediment filter
604	10"	The whole house 5 micron filter GAC Granulated Activated Carbon
602		Spanner Wrench
606	10"	The whole house KDF85 &GAC for chloramines, chlorine, heavy metals, bacteria
607	20"	The whole house 20" Iron reduction filter
608	10"	The whole house 10" KDF55 & GAC for chlorine, heavy metals, bacteria, algae
609		The whole house bracket
610	20"	The whole house 10 micron GAC filter
611	20"	The whole house 20 micron sediment filter
623	20"	The whole house chloramines and hydrogen sulphide removal
630	10"	The whole house fluoride removal
